

3. is not valid, since the computer won't read the string without a semicolon.

Modified:

$(A, B, (C, D)E)F;$

4. is not valid since ? is not a valid character. For the string to be valid, replace ? with a valid char.

$(A, B, (C, D)E)F;$

5. is not valid since ? is not a valid character. For the string to be valid replace ? with a valid char

$(A, B, (C, D)E)F;$
